www.aquacooler.com.au

Instant Filtered Boiling Hot Water

Seamlessly at a Touch of a Button.

**AQUA
COOLER®**

The **HYDRA MASTER** is Aqua Cooler's latest innovation in Under Bench Hot Water Drinking Water System.

It provides unsurpassed quality in the delivery of boiling hot water and refreshingly chilled water.

It's exclusive modern compact design combines advanced and contemporary technology with seamless construction that Aqua Cooler is renowned for.

With a myriad of functions designed for convenience, flexibility and efficiency, the Australian Made **HYDRA MASTER** is the Number one choice in hot water under bench drinking water systems.

HYDRA MASTER FEATURES

HYDRA MASTER

SIMPLICITY - RELIABILITY - AFFORDABLE

- * Our **HYDRA MASTER** is designed with simplicity in mind. By keeping it simple we have also ensured that in the long term, the unit will be extremely reliable.
- * Simple to install and provided with a comprehensive installation instruction and service manual.
- * Our **HYDRA MASTER** is provided with an electronic timer too, so that each unit can be programmed to be turned off when not in use (at night and/or weekends) and will therefore save power consumption and reduce your carbon footprint.
- * Each **HYDRA MASTER** is provided with a stylish, multifunctional, chrome faucet which allows a steady flow of both hot and cold water (When used in conjunction with a water cooler). The faucet is complete with a "childproof" feature.
- * Our faucet is very simple to use and is of solid metal construction for longevity.
- * If cold water is needed our **HYDRA MASTER** can easily be installed with an "Aqua Cooler" Under Bench Water Cooler. We have our UB1 (8Lph), UB2 (15Lph) or UB3 (5Lph).
- * The **HYDRA MASTER** can be installed just about anywhere - in commercial, industrial and domestic applications. Filters can also be installed alongside to ensure the delivery of fresh, clean water.
- * The **HYDRA MASTER** is back by Aqua Cooler's national service network
